Operator notification that critical quantity of Schedule 1 substances will be exceeded

Dangerous Goods Safety Act 2004
Dangerous Goods Safety (Major Hazard Facilities) Regulations 2007

This form should be completed by the operator of a place which has not been classified as a major hazard facility if:

- the operator intends to store or handle more than the critical quantity of Schedule 1 substances at the place, or
- more than the critical quantity of Schedule 1 substances is present, or likely to be present, and the operator intends to implement a significant change to any plant, process, substance or layout to the place, or
- the Chief Officer directs the operator to provide notification.

Please complete the sections below that are applicable to your circumstances. If any sections are not applicable, please insert N/A.

Part A Site and company information

Operator (business name or full name of individual)			
ACN/ABN			
Registered company address			
Registered company postal address			
Operator's contact details			
Phone number		Email	

Part B Submission information

Please indicate if an application for a dangerous goods site licence will be submitted with this notification.			
<input type="checkbox"/>	Application for a new site licence	<input type="checkbox"/>	Application for an amendment to a site licence
<input type="checkbox"/>	No change to existing site licence		
Signed by individual operator or on behalf of corporation			
Name			
Position			
Company			
Signature		Date	

Part C Schedule 1 Dangerous goods details

Please complete the field below by entering the date when the critical quantity of Schedule 1 substances present may have been exceeded, is expected to be exceeded or a notifiable change will occur.

Relevant date

Please complete the table below with the details indicated for each kind of Schedule 1 substance that is, or is expected to be, at the place at more than 20% of the critical quantity.

Provide a link or electronic copy of the SDS for each substance.

Proper shipping name (including technical name if not specified)	UN number	Class	Packing group	Quantity (t)	Critical quantity (t)	Proportion
Total proportion of critical quantity [r. 9]						

The critical quantity is 10% of the threshold quantity, in tonnes, as provided in Schedule 1 Table 1 and Table 2 of the Dangerous Goods (Major Hazard Facilities) Regulations 2007.

Part D Facility details

Dangerous goods site licence(s) and registered pipelines

Part D Facility details	
<p>Site address</p> <p><i>Provide sufficient detail to accurately locate the site</i></p>	
<p>Processes / activities</p> <p><i>Describe the main activities that occur or it is expected will occur at the place.</i></p> <p><i>For each Schedule 1 substance, describe its particular involvement in an activity (e.g. use or production – static storage, blending, synthesis, formulation, processing, heating, packaging, transport operations, process flow diagram or dangerous goods pipelines).</i></p>	
<p>Risk assessment and emergency plan</p> <p><i>In relation to Schedule 1 substances, describe all scenarios and potential consequences where people (both on and off site), property or the environment can be impacted.</i></p> <p><i>Include the maximum credible distance each scenario can cause serious harm.</i></p>	
<p>Location map</p> <p><i>Provide a scaled location map covering at least a 1km radius from the place.</i></p> <p><i>Identify the local government zoning in the surrounding area with particular attention to sensitive land use, residential and activities that may impact on the place.</i></p> <p><i>Show the potential impact zones of the major incidents on the surrounding area from Schedule 1 substances</i></p> <p><i>Provide sufficient details of the natural and built environment to enable assessment of the possible impact of a major incident.</i></p>	

Part D Facility details	
<p>Nearby population <i>Provide information on the approximate population and population density around the site. Detail the number of people who could be impacted by a major incident (including impact distances).</i></p>	
<p>Site plan <i>Provide a plan showing the layout of the site, including where it is expected the Schedule 1 substances will be stored, handled or transported; the location of the main activities at the site.</i></p>	
<p>Number of personnel on-site Provide information on the maximum number of personnel on-site. <i>Describe where, when and how many people are usually on the site during normal and after hours operations.</i></p>	

The table above needs to be completed for the Chief Officer's consideration pursuant to rr. 14-17.
